DETAILED ACTION

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Claims 28-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform to current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. In claim 28, line 5, "the operating behavior" lacks antecedent basis. In claim 28, line 6, the limitation "as a function of states detected by sensors" is indefinite and unclear in meaning and lacks in antecedent basis. Further "sensors" lacks positive recitation in the combination. Further in line 6 bridging to line 7 of claim 28, the recitation, "manual control commands, and/or specifications stored in memory" lacks clear antecedent basis, is indefinite and unclear and "memory" lacks positive recitation in the combination. In line 10 of claim 28, "on an at least partially automated basis" is vague and indefinite in nature, failing to clearly set forth the claimed invention. On line 18 of claim 28, "a press table" has not been positively recited in the combination. In claim 29, "a table top" lacks positive recitation in the combination and "the press table" lacks clear antecedent basis. All the claims and their deficiencies will not be rehearsed here

but they should be reviewed for like deficiencies as shown in claims 28 and 29 and amended into proper and idiomatic claim language commensurate with US claim practice.

3. Claims 28-54 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. Jones whose telephone number is 571 272 4518.
